

The International Journal of APPLIED ENGINEERING EDUCATION

Editor-in-Chief: Michael Wald
Hamburg Educational Partnership
Germany

Contents

M. S. Wald	331	Editorial
H. K. Messerle	332-340	An Interdisciplinary Approach to Energy Conversion
R. E. Hansen	341-348	Comparative Education in the Professions: The Case of Architectural Education
K. A. Stanzione and C. A. Bramble	349-357	The Enterprise of Aerospace Research and Vehicle Design
A. Hess	358-367	A CAI Approach to Teach Human Factors in Engineering
C. S. Slater, C. Vega and M. Boegel	368-374	Experiments in Gas Permeation Membrane Processes
W. Hubbi	375-380	An Alternative Approach for Teaching Circuit analysis
C. M. Wang and S. Kitipornchai	381-387	Integrated View of Methods in Buckling Analysis
P. J. Pritchard	388-391	Inviscid Flow at the Trailing Edge of an Airfoil
M. Samin Wahid and A. M. Eydaghi	392-397	Computer Simulation for Teaching System Stability Concepts
A. A. Kornhauser	398-400	Demonstrating the Limitations of the Ideal Gas Law
J. W. Gillespie, M. M. Monib, and D. S. Kukich	401-405	University-Industry Instructional Collaboration: A Model for Continuing Education and Retraining in Engineering
S. W. Yurgatis	406-409	The 'Design Library'—Introducing Students to the Use of Manufacturer's Literature

INDEXED/ABSTRACTED IN: *BIOSIS Database, Education Tech. Abst.,
INSPEC Database, International Civil Engng. Abs.,
PASCAL—CNRS Database*
