

Forthcoming Special Issue
Recent Trends in Mechanics Education
Guest Editor: Renata Engel

Contents

| | |
|--------------------------------------|---|
| R. Engel | Editorial |
| P. Chang and W. Fourney | Design-Based Course Sequence in Statics and Strength of Materials |
| P. J. Cornwell and J. Fine | Mechanics in the Rose-Hulman Foundation Coalition Sophomore Curriculum |
| F. Costanzo and G. L. Gray | On the Implementation of Interactive Dynamics |
| I. E. Eronini | Multiple-Feature/Multidisciplinary Design Project in an Introductory Engineering Mechanics Course |
| S. Holzer and R. Andruet | Experiential Learning in Mechanics with Multimedia |
| L. Glenn Kraige and D. Morris | Recent Changes in Engineering Science and Mechanics at Virginia Polytechnic and State University |
| K. Narh and H. Surjanhata | Innovations in Freshman Mechanical Engineering Curriculum at New Jersey Institute of Technology |
| M. Negahban | Results of Implementing a Computer Based Mechanics Readiness Program in Statics |
| T. A. Philpot | MDSolids: Software to Bridge the Gap Between Lectures and Homework in Mechanics of Materials |
| N. Salamon and R. Engel | A Management/Grading System for Teaching Design in Mechanics of Materials and other Courses |
| G. Staab and B. Harper | Use of Computers in Mechanics Education at Ohio State University |
