## Part 1

<b>M. S. Wald</b>	1	Editorial
<b>Ahmad M. Ibrahim and Aleksander Malinowski</b>	2–3	Guest Editorial
<b>Alexander A. Berezin</b>	4–12	Isotopic Engineering as a Conceptual Framework for Courses in Microelectronics and Quantum Informatics
<b>Ashraf A. Kassim, Sabbir Ahmed Kazi and Surendra Ranganath</b>	13–23	A Web-based Intelligent Learning Environment for Digital Systems
<b>Bostjan Murovec and Slavko Kocijancic</b>	24–30	A USB-based Data Acquisition System Designed for Educational Purposes
<b>L. Prat, D. Bardes, R. Bragós, J. Calderer, L. Castañer, V. Jimenez, P. J. Riu, S. Silvestre, F. Calviño and J. Bara</b>	31–38	Semi-distance Learning vs. Traditional Organisation for a Master's Degree in Electronic Engineering: An Experience at the Technical University of Catalonia (UPC), Spain
<b>Miguel Alonso, Jr. and Armando Barreto</b>	39–45	An Affordable Platform for Learning Real-Time Adaptive Signal Processing
<b>Hanania Salzer and Ilya Levin</b>	46–51	Atomic Requirements in Teaching Logic Control Implementation
<b>A. H. G. Al-Dhaher</b>	52–60	Development of Microcontroller/FPGA-based systems
<b>Asan Gani and Mje Salami</b>	61–69	Vibration Faults Simulation System (VFSS): A Lab Equipment to aid Teaching of Mechatronics Courses
<b>Maqsood A. Chaudhry</b>	70–76	Numerical Computation of Potential in Unbounded Two-Dimensional Regions using Schwarz-Christoffel Transformation
<b>Ayhan Bilsel and Erzat Erdil</b>	77–82	Experience Gained in Applying ABET Criteria to an Electrical/Electronic Engineering Program in a Turkish University
<b>S. Waks and C. R. G. Helps</b>	83–90	Dimensions in Electronics Education Change

## Part 2

### *Engineering Education Research and Policy*

<b>Yun-Yao Cheng, Jrjung Lyu and Yi-Chen Lin</b>	91–95	Education Improvement through ISO 9000 Implementation: Experiences in Taiwan
<b>J. G. Teng, C. Y. Song and X. F. Yuan</b>	96–102	Fostering Creativity in Students in the Teaching of Structural Analysis

### *Engineering Mechanics*

<b>C. J. Lissenden and N. J. Salamon</b>	103–112	Design Project for Advanced Mechanics of Materials
--	---------	--

### *Environmental Engineering*

<b>Robert P. Hesketh, C. Stewart Slater, Mariano J. Savelski, Kathryn Hollar and Stephanie Farrell</b>	113–123	A Program to Help in Designing Courses to Integrate Green Engineering Subjects
--	---------	--

### *Civil and Construction Engineering*

<b>Sai-On Cheung, Kevin K. W. Cheung and Henry C. H. Suen</b>	124–138	Web-based Learning in Engineering Education: A Portal for Teaching of Construction Contracts
---	---------	--

# Special Issue: Volume 19, Number 4

## Mechatronics Education

Guest Editor: Thomas Kurfess

### Contents

#### Part I

#### Mechatronics Education

Michael Wald	513	Editorial
Thomas Kurfess	514	Guest Editorial
Graham G. Rogers	515–518	The Teaching Philosophy of the REAL units of a Mechatronic Engineering Degree Program
M. K. Ramasubramanian, M. N. Noori and G. K. Lee	519–524	Evolution of Mechatronics into a Graduate Degree Program in the United States: The NC State University Master of Science Program with Mechatronics Concentration
Grace Lim, Kheng Swee Chua and Khee Yun Wee	525–531	Effects of Instructional Intervention Strategies on Students at Risk in Engineering Education
Rudolf Scheidl, Hartmut Bremer and Kurt Schlacher	532–536	Mechatronics Education at the Johannes Kepler University: Engineering Education in its Totality
M. J. E. Salami, N. Mir-Nasiri and M. R. Khan	537–543	Development of Mechatronics Engineering Degree Program: Challenges and Prospects
Alexandar Djordjević and Patri K. Venuvinod	544–549	Integrating Mechatronics in Manufacturing and Related Engineering Curricula
W. L. Xu and G. Bright	550–556	Massey Mechatronics—Designing Intelligent Machines
Eli Kolberg, Yoram Reich and Ilya Levin	557–562	Project-based High School Mechatronics Course
Swadesh K. Gupta, Shailendra Kumar and Lalit Tewari	563–568	A Design-Oriented Undergraduate Curriculum in Mechatronics Education
Martin Grimheden and Mats Hanson	569–574	Collaborative Learning in Mechatronics with Globally Distributed Teams
A. Geddam	575–580	Mechatronics for Engineering Education: Undergraduate Curriculum
J. Edward Carryer	581–585	Teaching Embedded Programming Concepts to Mechanical Engineering Students
Stojan Persin, Boris Tovornik and Nenad Muskinja	586–592	OPC-driven Data Exchange between Matlab and PLC-controlled System
William K. Durfee	593–596	Mechatronics for the Masses: a Hands-on Project for a Large, Introductory Design Class
Josko Petric and Zeljko Situm	597–602	Inverted Pendulum Driven by Pneumatics
Kyle Ressler, Kyle Brucker and Mark Nagurka	603–609	A Thermal Time-Constant Experiment
Alexandar Djordjević	610–614	Motion Control Demonstration for Easy Student Understanding
A. Al-Habaibeh and R. M. Parkin	615–622	Low-Cost Mechatronic Systems for Teaching Condition Monitoring
Mark Nagurka	623–630	Aerodynamic Effects in a Dropped Ping-Pong Ball Experiment

#### Part II

#### Engineering Education Research and Control Engineering

P. P. Parikh, R. Bindu and S. P. Sukhatme	631–638	Job Status and Career Profile of Women Engineers in India
H. K. Sardana and P. P. Arya	639–645	Training Evaluation of Engineering Students: A Case Study
K. L. Shi, T. F. Chan, Y. K. Wong and S. L. Ho	646–654	Modelling and Simulation of Direct Self-Control Systems
